

# KELPPRO

## Final Workshop

**TUESDAY 24. NOVEMBER – Language: ENGLISH**

**SCIENTIFIC FOCUS** – A presentation of results from the KELPPRO project

**DAY 1**

<b>09:00-09:20</b>	<b>Kasper Hancke</b>	<b>WELCOME</b> KELPPRO - an overview
<b>09:20-09:35</b>	<b>Ole Jacob Broch</b>	Kelp cultivation potential and scenarios for Norway
<b>09:35-09:50</b>	<b>Reinhold Fieler</b>	Dynamics of erosion from cultivated kelp, <i>Saccharina latissima</i> , and implications for environmental management and carbon export

**09:50-10:00** **Break -10 min**

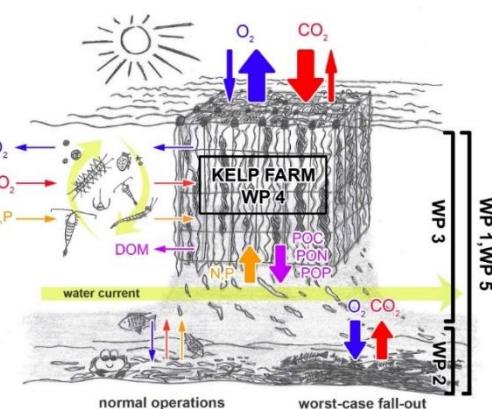

<b>10:00-10:15</b>	<b>Ole Jacob Broch</b>	Dispersal of detritus from farmed kelp
<b>10:15-10:30</b>	<b>Karl Attard</b>	Kelp degradation dynamics: Large kelp fall-out event simulated in situ
<b>10:30-10:45</b>	<b>Gunhild Borgersen</b>	Effects of industrial kelp farming on benthic faunal communities

**10:45-11:00** **Break -15 min**

<b>11:00-11:15</b>	<b>Emma H. Boldreel</b>	Kelp degradation dynamics: Laboratory measurements
<b>11:15-11:30</b>	<b>All</b>	<b>Questions and discussion:</b> Kelp export, deposition, effects on seafloor ecosystems, and potential for carbon sequestration

**11:30-12:30** **Lunchbreak - 60 min**

<b>12:30-12:50</b>	<b>Yngvar Olsen</b>	Nutrient uptake and intracellular stoichiometry of cultivated <i>Saccharina latissima</i> with evaluations of its potential interactions with the phytoplankton
<b>12:50-13:05</b>	<b>Elin Bjørndal Njåstad</b>	Variation in growth and chemical composition in cultivated <i>Alaria Esculenta</i> and <i>Saccharina latissima</i>
<b>13:05-13:20</b>	<b>Trine Bekkby</b>	Does the kelp farm function as an artificial kelp forest?
<b>13:20-13:30</b> <b>Break -10 min</b>		
<b>13:30-13:45</b>	<b>Trine Bekkby</b>	Does the kelp farm function as a vector for the spreading of alien species?
<b>13:45-14:00</b>	<b>Reinhold Fiebler</b>	Literature review on genetic diversity in natural kelp
<b>14:00-14:10</b> <b>Break -10 min</b>		
<b>14:10-14:20</b>	<b>Pia Kupka Hansen</b>	<b>Introduction to Day 2</b>
<b>14:20-14:30</b>	<b>Kasper Hancke</b>	<b>SUMMARY</b> KELPPROs findings and the way forward
<b>14:30-15:00</b>	<b>All</b>	<b>Questions and discussions:</b> Kelp nutrient uptake, role as artificial habitat, and effects on open water ecosystems

The functional role of a kelp farm and the major pathways behind potential **positive and negative effects** of a farm on the surrounding environment. KELPPRO aim to provide an integrated assessment of kelp farming on coastal environments.

# KELPPRO

## Avsluttende workshop

**ONSDAG 25. NOVEMBER – Language: NORWEGIAN**

**TEMA FORVALTNING** – Hvordan kan resultatene fra KELPPRO benyttes i forvaltning og overvåking i fremtiden?

DAG 2

**09:00-09:05 Pia Kupka Hansen INTRODUKSJON**

**OPPSUMMERING AV RESULTATER FRA KELPPRO PROSJEKTET**

**09:05-10:00 Ole Jacob Broch** Scenarier og potensialet for taredyrking i Norge

**Kasper Hancke** Miljøeffekter av taredyrking på havbunnen

**Yngvar Olsen** Miljøeffekter av taredyrking på de åpne vannmasser

**Trine Bekkby** Tareanlegg som kunstige habitater

**10:00-10:15 Kaffepause -15 min**

**10:15-10:30 Hartvig Christie** Dyrking av tare. Sett i perspektiv til dynamikken i naturlig tareskog

**10:30-11:30 Pia Kupka Hansen & Reinhold Fieler** Miljøvirkninger av taredyrking og tilnærming til overvåking

Basert på forskningsresultatene fra prosjektet vil det bli fremlagt tanker angående miljøovervåking av tareanlegg

**11:30-11:35 Kasper Hancke** Oppsummering
